

## Water distribution (meter) systems

You have also come to the right address for water, (metres) wells and tanks. You can choose from several wells with up to 12 metres.

### **Single / double/triple water meter wells**

The PVC well is , 315mm with 1 water meter, complete with coupling in/out, valve with drain / test valve and KIWA approved check valve with drain. These are also available with 2 or even 3 water meters.

### **Plastic water meter manhole cover 315mm/400mm**

We have a special PE lid for the 315mm and 400 mm wells which is manufactured in one piece with a solid handle. Quite simply pull the lid off the well without creating a vacuum. This material is very thick PE impact-resistant and guarantees a long life.

### **Central water meter wells**

If you do not want to use single well 315mm, we have a large plastic water meter tanks in our selection,, for which we can provide a water manifold with 12 water meters . The well light and easy to place due to the PE.

The horizontal ribbing prevents the well expanding. The in and exit pipes are easy to fit.

You are able to walk over the PE lid (the lid is also available in metal).
